

# PAPER OVER PLASTIC

## NEW PATENT PENDING DESIGNS AVAILABLE

*"An estimated 80% of a product's environmental impact is determined at the design stage." Ecovadis*

*"With over 170 trillion plastic particles in our oceans, pollution reaches unprecedented amount." CNN*

*"Paper is far more biodegradable than plastic and very easily recycled." Forbes*

As we approach our 100th year in business, Carton Service continues to innovate, especially in the area of sustainable direct contact containers. Our "can do" team enjoys the satisfaction that comes from working with unique customers and our company culture has always involved thinking ahead to what customers might need next. What they clearly want next are sustainable packaging solutions.

Paper packaging is now available for more uses than ever before. If you have filling equipment, Carton Service can help you with paperboard containers even for contents not traditionally packaged in paperboard.

Capable of sizeable run sizes, Carton Service is FSC Certified (FSC C-182277) and offers the following advantages:

1. An in-house creative services team to provide both structural and graphic design.
2. An in-house lab to test filling containers
3. State of the art skiving and sealing equipment.

Soap refills and primary containers can now be paperboard
